Job Experiences

AUNA Salud

01.2024 – 05.2024
Junior Project Manager

Technical team management, recruitment interviews, setting priorities with the product area, and communication with other company products.

05.2023 – 12.2023
Senior Technical Lead

Developed and maintained a SPA for use within a network of clinics. This application allows users to check the availability in medical schedules to book an appointment, validate health insurance, and indicate the costs to be paid on the day of the appointment. Technologies used included React, Node.js, Nest.js, MySQL, Redis, and Elasticsearch. The infrastructure was set up on AWS, using EC2, EventBridge, SQS, and Lambda.

Karvi

05.2022 – 03.2023
Senior Fullstack Developer

In the first stage, an internal application was developed to register vehicles that are later published on the site. Technologies used included React, Zustand, Tailwind, Next.js, Node.js, Express, and MongoDB. In the second stage, work focused on a B2C section of the site, a wizard where users can enter their vehicle data to receive an estimated value for negotiating within the platform. This stage involved implementing best practices for usability and HTML semantics, and conducting A/B testing to understand user behavior.

Yappa World Incorporated

10.2020 – 03.2022
Senior Fullstack Developer

Development and maintenance of an embedded application that provided a system for threads and audio or video comments. Worked primarily in frontend, content moderation, and audio and video processing. Technologies used included Vue, SASS, Node.js, NestJS, MS SQL, as well as infrastructure and moderation services provided by AWS.

Medallia

01.2020 – 09.2020
Senior Software Developer

Development and maintenance of the survey design application, using technologies such as React, Sagas, and GraphQL. Also performed the migration of old sections from AngularJS to React.

Elementum

02.2019 – 12.2019
Senior II Software Developer

Developed an internal framework for the company's product, allowing users to configure states (filters, view settings, recent searches) across different company applications, to share them with other users, persist them in their profile, and automatically recover the last state if the user needed to access from

another device. Technologies used for this development included Node.js, Express, Redis, and MongoDB.

10.2016 – 01.2019
Senior Software Developer

Development and maintenance of the product SPA, particularly in the inventory and transportation areas. Performed the technology migration from AngularJS to React, incorporating additional technologies such as Redux and Sagas. Also developed a component library using React and Styled Components.

Truelogic

04.2015 – 09.2016
Junior Front end Technical Lead

Leadership of frontend teams with 4 or 5 developers, code reviews, task estimation. I contributed to the development of new SPA applications and some mobile applications developed with Ionic and similar technologies.

10.2014 – 03.2015
Senior Web Developer

Specialization in the development of SPA applications, using frontend technologies such as AngularJS, Bootstrap, Angular Bootstrap and Google Closure.

09.2011 – 09.2014
Semi Senior Web Developer

Development of dynamic websites in PHP with MySQL, using frameworks like CodeIgniter, Bonfire, and others.

Indietech (Freelance)

05.2010 – 08.2011
Semi Senior Front end Developer

Web page layout with programming of interactions, effects, and animations, using technologies such as CSS3, HTML5, Canvas, and jQuery.

Soluciones Uno

06.2010 – 08.2011
Semi Senior Web Developer

Training of beginner developers, personalized client support, development timeline estimations, and leadership of a development team of 5 people.

03.2009 – 05.2010
Junior Web Developer

Development of content management systems, payment gateways, interactive sites with ActionScript, dynamic sites with PHP. Database modeling in MySQL.

04.2008 – 02.2009
Junior Web Designer

Website layout, design-related tasks, Flash animations, image and video optimization.

Other Experiences

3D Printing

During 2019, I started in this field and I am learning more every day. At the moment, I have built three printers, but I am sure that I have a lot more to learn.

Photography

I am an amateur photographer. I dedicate much of my free time to perfecting my knowledge about photography. I have taken some courses and spent a lot of money on equipment!

Design, audio and video

While my primary profession is something else, I developed a passion for web development during my final years of college. I always strive to apply my design knowledge, particularly in areas like HTML semantics and complex topics such as video compression.
